

Ad Launch Kit — It's Not Your Fault

*Built for a book that is not yet live. **Ads amplify a listing; they don't fix one.** Do Phase 0 first — get the book live and land 5–10 honest reviews — or paid clicks hit a page that can't convert and the money is wasted.*

Audience truth: the buyer is usually an **adult daughter, 45–65**, caring for a parent, searching at night, scared and overwhelmed. Every ad speaks to *her*, in the book's voice: *you're not failing, you just haven't been shown how.*

The tested hook (leads everything): "What do I do with my aging parent?" — answered by the title, *It's Not Your Fault*.

Phase 0 — Before a dollar is spent

- ☐ Book live on KDP, description + categories set
- ☐ **5–10 honest reviews** (beta readers, attorney-program recipients, family network) — the single biggest lever on ad ROI
- ☐ A+ Content / brand story added in KDP (free, lifts conversion)
- ☐ Author Central profile claimed

Channel 1 — Amazon Ads (start here: highest intent, cheapest)

Buyers are already shopping. This is where book ad dollars work hardest. Run inside KDP → Marketing → Advertising, or advertising.amazon.com.

CAMPAIGN A — AUTO (DISCOVERY) · \$10/DAY

- Type: Sponsored Products, **Automatic targeting**
- Bidding: **Dynamic bids — down only**
- Default bid: **\$0.35**, adjust after data
- Purpose: let Amazon find converting search terms; harvest the winners into Campaign B after 2 weeks.

CAMPAIGN B — MANUAL KEYWORDS · \$10–15/DAY

- Type: Sponsored Products, **Manual** → **Keyword targeting**
- Match: run **phrase** and **exact** (skip broad at first to control spend)
- Starting bid: **\$0.40–0.60** (books are cheap clicks)
- Seed keywords:
- caring for elderly parents
- aging parents help
- caregiver book
- dementia caregiver guide

- elder care planning
- how to care for aging parents
- sandwich generation
- hospice family guide
- power of attorney elderly parent
- medicaid long term care
- caregiver burnout
- assisted living decision

CAMPAIGN C — PRODUCT/ASIN TARGETING (ADD WEEK 3) · \$10/DAY

- Type: Sponsored Products, **Manual** → **Product targeting**
- Target the detail pages of comparable titles (your ad shows *on their listing*):
- *The 36-Hour Day*
- *How to Care for Aging Parents*
- *Being Mortal* (Atul Gawande)
- *Can't We Talk About Something More Pleasant?*
- *A Bittersweet Season*
- *The Caregiver's Encyclopedia*

NEGATIVE KEYWORDS (ADD TO A & B)

free, pdf, kindle unlimited, jobs, salary, certification, course, resume

HOW TO RUN IT

- Give it **2 weeks** / ~\$300 before judging — Amazon needs data.
- Watch **ACOS** (ad cost ÷ sales). For a first book, **breaking even on ACOS is fine** — you're buying rank and reviews, not just today's royalty.
- Every 3–4 days: pause keywords with lots of clicks and zero sales; raise bids on keywords that convert; move winning auto search-terms into Campaign B as exact.

Channel 2 — Meta Ads (Facebook / Instagram: emotional reach)

Your audience lives on Facebook. Objective: **Traffic** to the Amazon listing (or a cardinalspromise.com landing page — higher converting, see Channel 4). Start **\$15–20/day**.

AUDIENCE

- **Location:** United States
- **Age:** 45–65 · **Gender:** All (skew female in results, don't pre-exclude men)
- **Detailed targeting (interests):** Caregiver · AARP · Alzheimer's Association · Aging in place · Assisted living · Hospice · Dementia · Family caregivers · Elder law
- **Later:** build a **Lookalike** from the pixel/page engagers once traffic flows
- **Placements:** Advantage+ (let Meta optimize), or manual: FB Feed, IG Feed, Stories

AD COPY VARIANTS (TEST 3–4 AT ONCE, \$5/DAY EACH, KILL LOSERS)

1 — The midnight question

It's 2 a.m. and you're Googling "what do I do with my aging parent?" You're not failing. Nobody handed you a map. This book is the map. It's Not Your Fault: Helping Caregivers with Aging Loved Ones.

2 — Permission

You didn't sign up for this. A fall, a diagnosis, a discharge planner asking where Mom goes next — and somehow you're supposed to know. A Certified Dementia Practitioner wrote the guide he wished every family had.

3 — The color-code

29 chapters, color-coded by urgency — RED: act today · PURPLE: watch closely · BLUE: plan ahead. Find the right page in under a minute, on your worst day.

4 — The burnout angle

A plan that protects your parent but breaks you is not a real plan. This book helps you care for them and survive it.

5 — The scam/finances angle (Clark Howard tie-in)

A missed bill. A withdrawal she can't explain. A scammer who finally got through. Sometimes the checkbook shows what a face still hides. Learn what to watch for.

CREATIVE DIRECTION (NO FABRICATED FACES/TESTIMONIALS)

- **Hero image:** the book cover on a warm, softly-lit table (real object shot) — converts well and stays honest.
- **Text-card ad:** cream background, navy type, the midnight-question hook — cheap to make, matches the brand.
- **Short video (15s):** slow pan over the open workbook pages + the hook as captions; the color-coding is visually distinctive.
- Avoid stock "sad old person" clichés — they read as insurance ads and underperform.

Channel 3 — The channel you already own (don't sleep on it)

The **elder-law attorney / financial-advisor bulk + bookplate program** (already built: sell sheet, outreach emails, Triangle prospect list) is higher-value than paid clicks. One firm buying 50 copies at a bulk rate beats hundreds of \$0.50 clicks — and it's a warm, repeatable channel. Work this in parallel with the ads.

Channel 4 — Landing page (lifts every paid click)

Cold traffic converts better on a page you control than on a bare Amazon listing.

Simple cardinalspromise.com page: the hook → what the book is → one **Buy on Amazon** button → optional free-worksheet email capture (feeds a Kit welcome sequence). Send

Meta traffic here; send Amazon Ads straight to the listing.

90-Day rollout & budget (adjust to comfort)

WEEKS	FOCUS	DAILY SPEND	GOAL
0	Launch + first reviews	\$0	5–10 reviews, listing dialed in
1–2	Amazon Auto + Manual	~\$20	find converting keywords
3–4	Add Amazon Product-targeting; launch Meta test	~\$40	first repeatable ROAS signal
5–8	Scale winners, cut losers; build Lookalike	~\$50–75	profitable/break-even ACOS
9–12	Double winning ad sets; push attorney channel	scale to comfort	steady rank + B2B orders

Honest guardrail on "massive": don't scale a channel until it shows a repeatable return at small spend. \$50/day that converts beats \$500/day that doesn't. Scale the winners; don't front-load the budget.

*Cardinal Promise Press · It's Not Your Fault: Helping Caregivers with Aging Loved Ones ·

Hook and copy panel-tested; no fabricated reviews or endorsements.*
